SUMMARY

Motivated B.Tech Artificial Intelligence & Data Science student (2024–2028, CGPA: 9.16) with strong Python fundamentals and hands-on full-stack web development experience. Proficient in writing clean, readable Python code with solid understanding of OOP, data structures, and REST API design. Experienced with relational databases (SQL/MySQL), Git-based collaborative workflows, and connecting Python backends to frontend interfaces. Eager to contribute from day one with minimal hand-holding in a fast-paced engineering environment.

EDUCATION

B.Tech – Artificial Intelligence and Data Science	CGPA: 9.16 / 10.0
Kongu Engineering College, Perundurai, Tamil Nadu	2024 – 2028
Higher Secondary Certificate (HSC)	89.4%
Cambridge Matric Hr. Sec. School, Agasthiarpatti, Tamil Nadu	2024
Secondary School Leaving Certificate (SSLC)	94.4%
Cambridge Matric Hr. Sec. School, Agasthiarpatti, Tamil Nadu	2022

PROJECTS

FindSphere – Campus Lost and Found System [GitHub](#)

- Built a full-stack web application with a Python backend and HTML/CSS/JavaScript frontend, connected via RESTful API endpoints for seamless data exchange between layers.
- Designed and implemented relational database schemas using SQL to securely manage item records and user data with efficient query patterns.
- Applied OOP principles and clean code practices throughout backend logic; managed the codebase with Git using structured branching, commits, and pull requests.

Sentiment Analysis Web Application [GitHub](#)

- Developed and deployed a Python-based application using Streamlit for automated sentiment classification of product reviews extracted from PDF documents.
- Wrote modular, readable Python code leveraging TextBlob for NLP processing, following separation-of-concerns and clean coding standards throughout.
- Built interactive data visualizations to surface sentiment trends, demonstrating the ability to deliver API-driven insights through an accessible, user-friendly interface.

SKILLS

Core Python	Python (OOP, Data Structures & Algorithms, Clean Code), RESTful API Development
Backend Frameworks	FastAPI (learning), Flask, Express.js, Node.js
Databases	MySQL, SQL query writing & schema design, MongoDB (NoSQL)
Frontend	HTML5, CSS3, JavaScript, React.js; experienced in connecting frontends to Python APIs
Version Control	Git & GitHub – branching, committing, pull requests, collaborative workflows
Tools & Deployment	VS Code, Postman, Streamlit; comfortable following cloud/deployment instructions
Concepts	Object-Oriented Programming, REST API Design, Data Structures & Algorithms
Soft Skills	Problem Solving, Team Collaboration, Quick Learning, Communication

ACHIEVEMENTS & ACTIVITIES

- Maintained a CGPA of **9.16/10** in B.Tech AI & Data Science at Kongu Engineering College.
- Scored **94.4%** in SSLC and **89.4%** in HSC, demonstrating consistent academic excellence.
- Actively contributed to open-source projects on GitHub, maintaining clean commit histories and documentation.
- Continuously expanding skills in FastAPI and cloud deployment to align with industry-standard backend practices.
